Appendix A
State of Hawaii's Outpatient Substance Abuse Treatment
(Formerly Level II)

Outpatient primary treatment services utilize a cognitive behavioral treatment component lasting approximately 80 hours, meeting twice per week, over a twenty-week period. The curriculum utilized is The Residential Drug Abuse Program (RDAP). Four (4) selected Journals are used as a stand-alone program resulting in a self-assessment. Each Journal systematically builds on the previous Journal, thereby increasing the level of knowledge, skills, and awareness.

Outpatient services are for Inmates who are at lower risk for criminal conduct and meet diagnostic criteria for substance abuse or dependence. They have had minimal disruption in their psychosocial or vocational functioning.

SERVICE ACTIVITIES

A. Assessment services and treatment planning

Individuals will be referred for treatment based on the completed LSI and ASUS instruments (Intake & Initial), multi-leveled assessment instruments initially completed in Halawa's RAD Unit which will indicate level of risk, level of criminogenic needs, and substance abuse problems across 6 domains, involvement, disruption, anti-social, emotional, defensiveness and motivation.

The scope of the assessment shall include a full analysis of the offender's strengths and weaknesses as determined from an evaluation of the following areas: current health status, medical history, alcohol and drug use history, emotional and behavioral functioning, social history, family background, relationships, legal history, occupational and educational history, degree of denial, readiness for treatment, behavioral performance while incarcerated, as well as other pertinent information available.

An individualized comprehensive treatment plan shall be developed from the LSI and ASUS instruments (Intake & Initial) for those who have been identified as having moderate to serious substance abuse problems and who have been accepted for admission to structured Outpatient group education and treatment services. Treatment plans must include, at a minimum, the following information:

- Identification of inmate's problem areas;
- Type(s) of treatment services recommended;
- Short and long range treatment goals;
- Target activities and dates for accomplishing objects as a means of measuring treatment progress;
- Process for periodic review and update of treatment plans; and
- Roles and responsibilities of both inmates and program staff.

Treatment plans will be individualized to meet different inmate needs and will be specific enough to measure each offender's progress through the treatment process. Each

participant's treatment plan and progress will be reviewed periodically and updated as necessary by program staff. PROVIDER's counselors shall also assume case management responsibilities for the substance abuse programming of sentenced offenders and will work closely with treatment staff of the different service components of the substance abuse continuum as well as with appropriate staff at the correctional facilities.

A copy of the treatment plan shall become part of the Inmate's regular institutional file which facility case workers and parole officers may review. As an Inmate progresses through treatment, the plan shall be reviewed on a monthly basis and updated as needed.

Periodic update and review of treatment plans shall occur while participating offenders are receiving structured educational and treatment services and individual and family counseling services. Treatment plans for all sentenced offenders participating in the substance abuse treatment continuum shall be reviewed and updated prior to the inmate's release from the correctional facility.

B. Treatment Services

Following assessment and development of an individualized treatment plan, each sentenced offender shall receive a substance abuse and criminality treatment continuum aimed to provide target group inmates with a structured program of cognitive/life skills training, and group counseling with a behavior/cognitive focus rather than a purely educational or twelve-step oriented approach as a means of facilitating each offender's recovery and preparation for eventual discharge and release into community status.

The Outpatient Program shall consist of Treatment Groups held not less than twice each week for a period of two hours per group covering the four selected Journals of the RDAP curriculum that address cognitive restructuring and initial in-roads to cognitive processes, with homework and Journal requirements outside of the classroom for a period of 20 weeks. Contingent upon inmate availability and meeting room size, the format for treatment groups shall consist of two weekly sessions of 2 hours each, as follows:

- Weekly process or focus group with a maximum of 18 Inmates each facilitated by one counselor; and
- Each of the 18 participating Inmates will receive four (4) hours of structured group counseling per week. The group counseling will include role modeling, role-playing and skill practice activities.

Criteria for admission, discharge and re-admission to the group will be based upon multiple factors. Criteria for admission includes:

1. Inmate is referred for treatment by Department staff.
2. Inmate has been assessed as having a moderate to serious substance abuse problem.
3. Inmate chooses to participate, i.e., voluntary admission.

4. Inmate's substance abuse screening specifies outpatient treatment as part of the overall rehabilitation plan.
5. Inmate's current behavior in the correctional facility merits the opportunity to participate.

Criteria for clinical discharge from the group are based upon attendance, participation, conformity to rules, absence of dirty urinalysis tests, and progress made regarding completion of individualized treatment plan objectives. Participants should be required to demonstrate mastery of the skills practiced in the group sessions. Participants may be terminated from group treatment for failure to comply with their treatment plan or group rules, including non-excused absenteeism.

Criteria for re-admitting Inmates to the group if they are terminated for breaking program rules is based upon: (1) Inmate must wait for at least thirty days before reapplying for re-admission; (2) Inmate must be recommended for re-admission by Department staff; and (3) re-application must be accepted by PROVIDER's counselors and participants of the group.

Treatment sessions shall provide offenders with the first four Journals of the RDAP curriculum:

- Overview of program/building rapport and trust
- Building a desire and motivation to change
- Building the knowledge base to change
- Self-disclosure and receiving feedback: pathways to self-awareness and change
- Preventing relapse and recidivism: identifying high-risk situations
- How do people change: understanding the process of self-improvement and change
- Developing a commitment to change
- In-depth assessment: looking at the areas of need and change

In the process of presenting material in these content areas, counselors are expected to use lecture, group activities, open discussion, role modeling by staff, role-play by staff and inmates, inmate skill practice activities, and written assignments. Outpatient groups will be structured to ensure that the materials are adequately covered, reviewed, and the participant has sufficient opportunity to practice effective behaviors that target the top three criminogenic areas and receive feedback.

The structured group treatment program shall provide weekly group counseling sessions that will emphasize inmates' personal recovery, responsibility and awareness. Group sessions are intended to help inmates internalize and apply lessons from the skill-building groups. Group counseling sessions use the interaction of group participants in order to affect the desired changes necessary to achieve individual treatment plan objectives. Through participation in treatment groups, inmates learn from each other and receive the strength of group support. Through the process of giving and receiving feedback in-group

sessions, inmates become more aware of the skills they need to develop to prevent future criminal activity and begin to accept ownership and responsibility for the consequences of their behaviors and lives in general. (Approximately 80 hours)

Although the program consists mostly of structured group sessions, PROVIDER's counselors shall also be available to provide individual sessions as needed for the purpose of evaluation/treatment planning, individual counseling, case management or individual consultation. (Approximately 16 hours)

C. Individual Counseling

Individual counseling shall be provided according to individual inmate need as indicated in the inmate's treatment plan. While most inmates will require only a minimal amount of individual counseling, other inmates may need more extensive amounts of one-on-one counseling. Individual sessions shall focus on the top three criminogenic areas identified in the offender's treatment plan, and what the inmate needs to do to successfully change their behaviors, to better assist the inmate with the reintegration process necessary for successful transition to community living.

.2 Definitions

a. Initial Classification

The initial classification of a jail or prison inmate is conducted to determine the custody designation appropriate to the inmate's needs and the risk the inmate represents to security. The five custody designations to which an inmate can be assigned are: maximum, close, medium, minimum, and community.

1. Jail inmates should have an initial custody screening instrument completed within seventy-two hours (72) hours of admission to the department; and
2. Prison inmates shall have an initial custody instrument completed within sixty (60) days upon transfer to the RAD unit.

COR P & PM	SUBJECT: INMATE CLASSIFICATION SYSTEM	POLICY NO.: COR. 18.01
		EFFECTIVE DATE: 2/19/09
		Page 2 of 11

b. Reclassification

A formal re-assessment of the inmate's custody designation. Reclassification shall be conducted at least every six months (after the last classification action) or every 12 months for inmates designated as community custody and after any change which may affect the inmate's security or custody designation, i.e., following new sentence(s), sentence reduction, or adjudicated major (high or greatest) misconduct(s).

c. Classification Committee

The authority for all adverse institutional classification actions is delegated to this committee. The classification committee should consist of one or more members. The composition of the committee may include the Facility Classification Coordinator/designee, case manager, or other members as deemed appropriate by the branch facility Warden or their designee.

d. Initial Classification Instrument

The initial prison classification instrument shall be completed by the RAD case manager assigned to the inmate.

e. Reception, Assessment, Diagnostic (RAD)

A Reception, Assessment, Diagnostic Unit that conducts an Initial Classification, Level of Service Inventory-Revised (LSI-R), Adult Substance Use Survey (ASUS), and a prescriptive plan for services based on information from the LSI-R and ASUS on all newly sentenced felons in the Hawaii correctional system.

f. Facility Classification Coordinator

Ensures that all classification actions or recommendations conform to departmental policy and procedures on Inmate Classification.

g. Custody Designation

The result of a classification process that determines placement at or within a facility based on housing, programming, and the degree of staff supervision required by the inmate.

<p>COR P & PM</p>	<p>SUBJECT:</p> <p>INMATE CLASSIFICATION SYSTEM</p>	<p>POLICY NO.: COR. 18.01</p>

h. Custody Level

Custody level will determine the degree of physical control and staff supervision that an inmate requires. This will determine the inmate's facility designation and types of programs the inmate will have access to. Custody level is based upon a number of factors, including but not limited to operational and physical plant criteria. A single facility may have more than one level of security within its perimeter. There are five custody levels: maximum, close, medium, minimum and community.

i. Prison Inmate

Any inmate committed to serve more than a one (1) year sentence, including sentenced misdemeanants with consecutive terms totaling greater than one year. Also includes parole violators.

j. Jail Inmate

Any inmate committed to serve less than one year (probation felons, sentenced misdemeanants, sentenced petty misdemeanants), pre-trial detainees, federal/other state holds. Also includes probation violators pending violation hearing adjudication.

k. Initial Classification Instrument

The form used to determine initial prison inmate custody designation and to determine initial inmate facility placement. This form is completed by the Reception, Assessment and Diagnostic (RAD) unit assigned case manager.

l. Reclassification Instrument

The form used to determine adjustments in inmate custody designation after the establishment of the minimum term by the Hawaii Paroling Authority and also used to recommend transfer to a different facility or housing level than currently assigned.

m. Initial Custody Screening Instrument

The form used to determine initial jail inmate custody designation and

recommend housing assignment. This form is completed by the Intake Service Center social worker at the various Intake Service Centers.

n. Jail Classification Review Instrument

The form used to determine adjustments in a jail inmate's custody designation upon a change of status from pre-trial to sentenced jail.

o. Exception Cases

Cases in which administrative action may override the custody scoring to ensure appropriate placement. These actions will provide for the safety of staff, inmates and the community, and will help ensure the good management of the facility.

p. Inmate Housing

Principal area of housing assignment, i.e., residency module, annex, holding unit or other living accommodations for offenders within a facility perimeter.

q. Institutional Program Areas

Areas within a facility perimeter where inmates participate in programs such as educational, vocational, and specialized treatment, that allow for freedom of movement under general supervision.

r. Security Area

Established limits within a facility where inmates cannot proceed past unless under escort.

s. Security Perimeter

u. Orientation/Intake Unit

Each facility with sentenced felon populations should have an intake Orientation Unit where newly admitted/transferred inmates shall be housed until the transfer assessment process is completed, and appropriate housing and program assignments are determined.

v. Adverse Classification Action

Adverse classification action is any increase of one step or more in custody designation. Other types of adverse actions are: transfer of a pretrial or state/federal hold inmate to prison and transfer of an inmate for the purpose of providing more restrictive security, the result of misconducts, and/or change in sentencing status.

3.0 POLICY

A systematic and objective classification program shall be established to facilitate correctional goals which promote public safety and reintegration opportunities through placement in programs involving increasing degrees of community involvement.

Classification shall be based on a need for differential care and handling of inmates, according to the individual's assessed needs and the risks presented. The classification process is two-fold: i.e., initial classification for appropriate facility assignment and reclassification for movement between security levels and/or facilities. While evaluations are consistently based on a specific set of variables, sensitivity to the inmates changing needs and behavior are not precluded.

Each inmate under the care and custody of the Department of Public Safety shall be classified for security purposes according to the level of risk he/she represents to the facility and to the community at large. It is also the Department's policy that each inmate should be classified at the least restrictive capacity consistent with security needs. No inmate should receive more supervision or be kept at a more secure status than his/her potential risk dictates. Whenever possible, inmates shall be assigned to housing consistent with their custody.

In the implementation of the classification system, the following shall be adhered to:

- .1 Segregation of inmates shall not be based on race, color, creed, national origin, or religion.

COR P & PM	SUBJECT: INMATE CLASSIFICATION SYSTEM	POLICY NO.: COR. 18.01
		EFFECTIVE DATE: 2/19/09
		Page 6 of 11

- .2 Whenever possible, violent, predatory inmates, and inmates who may be subjected to violent acts shall be housed separately from the general population.
- .3 Jail inmates shall be housed separately from prison inmates, unless a threat is posed to the good management of the facility, and an exception case transfer form (DOC 8202) is initiated through the adverse custody hearing process. Approval shall be retained through the Classification Office.
- .4 Males shall be housed separately from females.
- .5 All adverse classification actions shall be conducted in an objective manner to ensure due process safeguards.

4.0 CLASSIFICATION DESIGNATIONS

The following classification designations will be used in assigning inmates to appropriate supervision:

.1 Maximum Custody

Maximum custody will be reserved for inmates who have shown through their institutional behavior that they are unable to function appropriately in the general population, regardless of the amount of time left to serve. This will include the violent, predatory, chronically disruptive, and serious management problem inmates who disrupt the safe operation of a facility. The decision to place an inmate in maximum custody must be judiciously made through an exception case request and will be subject to monitoring by the facility classification committee at a minimum of every 6 months.

When classified maximum custody, the inmate is assigned to a highly restricted area or to a maximum security-type facility. These inmates definitely present an escape risk and/or management problem. Public safety is a major concern for these types of inmates. The level of supervision required for maximum custody is as follows:

Supervision Required

Residency Area:

Restricted to room or quadrant; constant surveillance.

COR P & PM	SUBJECT: INMATE CLASSIFICATION SYSTEM	POLICY NO.: COR. 18.01
		EFFECTIVE DATE: 2/19/09
		Page 7 of 11

Security Area:	Movement under escort and with or without restraints; constant supervision
Outside Security Area, within Perimeter:	Movement under escort of two uniformed officers, with restraints; constant supervision.
Outside Perimeter:	Restraints and escort shall be in accordance with the provisions of confidential Policies COR. 08.01, Court appearance and Transport of Inmates and COR 08.24, Use of Mechanical Restraints
Meal Movement:	Fed in cell or quadrant.

.2 Close Custody

This custody will be used for those inmates with long minimum sentences (21 years or longer), serious escape risks, and other types of inmate characteristics that may require higher controls in the general population. Inmates placed in close custody as a result of a long minimum sentence shall be reviewed after five years of observation for consideration of reduction of custody to medium. Should a reduction of custody level not be granted at the first review, the inmate shall be reviewed every year thereafter until medium custody is attained. The close custody inmate will be assigned to facilities designated as medium, but will be subject to restrictions concerning the hours they are allowed to mix with the general population and the types of programs they may participate in. Close custody inmates cannot be assigned to programs outside the security area, such as motor pool or outside worklines. Close custody inmate will be subjected to security headcounts every two hours outside their residency area. The levels of supervision for close custody inmates are as follows:

Supervision Required

Residency Area:	Freedom of movement; constant surveillance.
Security Area:	Movement under constant surveillance; report for count every two hours. Must be under escort after daylight hours.

.3 Medium Custody

Medium custody may include long term moderate and low risk prison inmates or marginal risk inmates. The inmate's institutional conduct and adjustment indicates a need for continuous control and frequent supervision. Medium custody is also assigned to parole/probation violators prior to a revocation hearing.

The medium custody inmate is assigned to a more secure residency area within a multi-level security facility or to a medium security-type facility. These inmates may present an escape risk or management problem(s). The levels of supervision for medium inmates are as follows:

Supervision Required

Residency Area:

Freedom of movement; constant or
intermittent supervision.

Movement with constant or intermittent

.4 Minimum Custody

Minimum custody is for low risk prison and jail inmates who have 48 months or less to parole/release eligibility and have demonstrated through their institutional conduct and adjustment a minimal need for control and supervision, have no felony hold or detainer, have not been involved in a violent episode within the last 12 months, and did not escape or attempt to escape from the department within the last seven years. Medical and mental health clearance is required for transfer to a minimum-security facility. Inmates who refuse to actively participate in available correctional programs to address-identified problem areas shall be excluded from minimum or community custody. Inmates on psychotropic drugs are also excluded, unless they have been approved/cleared by the facility psychiatrist. Inmates identified for sex offender treatment must obtain clearance from the Administrator of the Sex Offender Treatment Program. The inmate is assigned to the least secure housing area available within multi-level facility or to a minimum-security facility. These inmates tend to present low escape risk or management problems. The levels of supervision required for minimum custody are as follows:

Supervision Required

Residency Area:

Freedom of movement is allowed within the residency and multi-purpose area with intermittent supervision.

Security Area:

Movement under intermittent surveillance.

Outside Security Area, within Perimeter:

Movement under escort; constant surveillance.

Outside Perimeter:

Restraints and escort shall be in accordance with the provisions of confidential Policies COR.08.01, Court appearance and Transport of Inmates and COR 08.24, Use of Mechanical Restraints.

.5 Community Custody

Community custody is a program custody for low risk prison or jail inmates who have met the requirements for minimum custody and are within **24** months to discharge or parole eligibility. Medical and mental health clearance is required to ensure participation in community service worklines and/or furlough **with** or **without** restrictions. Inmates on psychotropic drugs are to be excluded, unless they have been approved by the facility psychiatrist. Those inmates identified for sex offender treatment require a Sex Offender Custody Level Review recommendation for community custody (see attachment, form DOC 8760). Those inmates identified for sex offender treatment who do not have the recommendation of the Sex Offender Treatment Program Administrator will be excluded from community custody. This is to ensure satisfactory completion of the Sex Offender treatment program in a secured setting and appropriateness for furlough participation.

Inmates who refuse to actively participate in available correctional programs to address-identified problem areas shall be excluded from minimum or community custody.

Community custody inmates require the following levels of supervision:

Supervision Required

Residency Area:

Freedom of movement with intermittent surveillance.

Security Area:

Movement under intermittent surveillance.

Outside Security Area, within Perimeter:

Movement with or without escort.

Outside Perimeter:

Movement with or without escort. There are instances in which security requires an inmate to be restrained.

Meal Movement:

Under general supervision.

It is agreed that enforcement of the terms and conditions of this Contract, and all rights of action relating to such enforcement, shall be strictly reserved to the State and the Provider, and nothing contained in this Contract shall give or allow any claim or right of action whatsoever by any other person on this Contract. The State and the Provider intend that any entity, other than the State or the Provider receiving services or benefits under this Contract, shall be deemed an incidental beneficiary only.

B. Publicity. The following supercedes General Conditions, Section 6.2:

The Provider shall not refer to the State, or any office, agency, or officer thereof, including the PSD, or to the services provided under this Contract, in any of the Provider's brochures, advertisements, or other publicity of the Provider, except that the Provider may disclose the actual fact that the Provider has a current contract to house male Inmates with the State. This language will not be embellished by Provider in any form or fashion. All media contacts to the Provider about the Inmates or this Contract shall be referred to the State. The Provider shall not be authorized to release publicity concerning Inmates. Requests for personal histories or photographs of Inmates or information concerning their arrival or departure or permission to interview or photograph Inmates shall be referred to the PSD's Mainland Branch.

STATE OF HAWAII

SPECIAL CONDITIONS

The State must provide the Provider with written notice of such claimed breach described in particularity, and the Provider is allowed 30 days in which to cure such alleged breach after receipt of such written notice. If the breach cannot be cured within 30 days after such notice but the breach can be cured through an on-going effort on the part of the Provider, the Provider may, within the 30-day period following notice of the breach, submit a plan for curing the breach within a reasonable time. If the plan is approved by the State, and such approval shall not be unreasonably withheld, the State shall not pursue remedies hereunder as long as the Provider timely undertakes to cure the breach in accordance with the approved plan. - 6.) If this Contract is terminated for cause, the Provider shall not be relieved of liability to the State for damages sustained because of any breach by the Provider of this Contract. In such event, the State may retain any amounts, which may be due and owing to the Provider until such time as the exact amount of damages due to the State from the Provider has been determined. The State may also set off any damages so determined against the amounts retained. The State retains its right to sue for damages.
- 7.) The Provider shall have the right to terminate this Contract for the State's non-payment of invoices by giving written notice to the State of such termination no later than 60 days before the effective date of termination. After receipt of such written notification of termination, the State is allowed 30 calendar days in which to cure the alleged non-payment of invoices. Any dispute as to the amount of the alleged non-payment owed the Provider shall be resolved in accordance with Section E, Disputes. A dispute as to the amount of non-payment owed the Provider alone is not grounds for termination of this Contract if the disputed monies are either placed in escrow or are paid without any waiver of the State's rights under Paragraph F, Refund Payments for Services or Expenditures Not Authorized.
